

# Puget Sound Conservation Districts

## 2024 COLLECTIVE IMPACT

From the Cascades to the peninsula, conservation districts partner with communities to improve our soil, water, forests, farms, and habitat.

**480 LANDOWNERS**

increased wildfire resiliency

**62,991 YOUTH & ADULTS**

engaged through education & events

**477,626 NATIVE PLANTS**

put in the ground to build climate resilience

**828 CRITICAL HABITAT ACRES**

of riparian & estuarine habitat restored

**6,538 FOREST ACRES**

made healthier & more resilient through technical assistance

**52,740 FARM ACRES**

benefited with technical assistance & projects to increase viability

**1.9 MILLION GALLONS**

conserved or recharged into the soil, enhancing local hydrology & soil health

## Key Programs

- Forest Health and Wildfire Resiliency
- Riparian Habitat Restoration
- Freshwater and Marine Shoreline Health
- Agriculture Viability
- Sustainable Urban Food Systems
- Integrated Floodplain Management
- Healthy Livestock and Land Management
- Stormwater Pollutant Mitigation and Water Quality

## Funding

### State Conservation Commission

- Riparian Grant Program
- Sustainable Farms and Fields
- Forest Health and Community Wildfire Resiliency

### Recreation & Conservation Office

- Salmon Recovery Funding Board

### Department of Ecology

- Floodplains by Design
- Centennial Clean Water grants
- Climate Commitment Act

### Department of Natural Resources

## Who We Are

Conservation districts have served Washington state for more than 80 years. In 2006, the twelve Puget Sound conservation districts (PSCDs) joined together to form a collaborative, regionally-focused partnership.

**We envision a climate-resilient future where local residents work together to steward natural resources for a healthy and productive region.**

**Total Population: 5,228,039**
